

Environmental Policy

Stowe Australia provides an array of electrical and communications solutions to the energy, construction, engineering, resources, industrial and social infrastructure sectors within Australia. We recognise that operating in a safe and environmentally responsible manner is paramount to the continued growth of our organisation's reputation, quality and reliability. We value our employees, the environment, and business and place the utmost importance on all work within our workplaces and operations.

Our Beliefs

- ✓ All incidents can be prevented
- ✓ All products and services rendered can be completed with Zero Harm to the environment
- ✓ Relationships with key stakeholders can be enhanced through an efficient Management System

Our Commitment

- ✓ Continually improve our environmental performance and prevention of pollution and adverse environment impact considering best practice, available technologies, current knowledge and understanding, client and community expectations;
- ✓ Promote and communicate this Environmental Policy to all company personnel and other interested parties;
- ✓ Integrate our Environmental Policy and procedures into all business activities as a critical element;
- ✓ Promote and encourage the adoption of our policy principals to suppliers and subcontractors performing work on our clients' sites and facilities when acting on behalf of Stowe Australia;
- ✓ Develop, implement and maintain emergency preparedness plans;
- ✓ Foster consultation with employees, clients and the community, encouraging them to raise any concerns or improvement suggestions within the scope of our company's' operations;
- ✓ Promote sustainable environmental work practices as the responsibility of every Stowe Australia executive, manager, employee, sub-contractor and supplier;
- ✓ Establish Environmental objectives and targets through all levels of the business in alignment with our strategic direction to satisfy interested parties and achieve our intended outcomes;
- ✓ To communicate, monitor and review Environmental objectives, targets and performance;
- ✓ Promote a risk-based management approach for controlling the risk of harm to people and the environment within all planning, operational, evaluation and improvement processes;
- ✓ To comply with all applicable environmental legal & regulatory obligations;
- ✓ Identify, evaluate and review environmental aspects associated with the delivery of our products and services and implement risk controls to eliminate or reduce our impact on the natural environment;
- ✓ Enhance employee understanding of environmental sustainability by providing training and resources to ensure that all concerned have the relevant skills and qualifications for the effective operation of the Environmental Management System and to fulfil our environmental obligations;
